

Clinton Cochrane

clinton.edward.cochrane@gmail.com (318) 550-8495

Experienced full-stack developer with 10+ years building scalable web and mobile applications using JavaScript/TypeScript, Python, PHP/Laravel, and C#/.NET. Passionate about clean architecture, developer productivity, and delivering fault-tolerant systems. Recently focused on high-traffic e-commerce and emergency management platforms. Seeking a hands-on development role where I can build, ship, and iterate on high-impact features.

EXPERIENCE

Luminos Labs Tech Lead July 2023 - Apr 2024

Stack: Next.js, Vue.js, TypeScript, Node.js, REST APIs, Algolia Search AI, Clover Payments

- Led a full e-commerce redesign resulting in a 3× increase in purchase volume from Q3 → Q4.
- Architected Next.js front-end and backend integrations, improving page load times by ~40% and increasing peak reliability.
- Designed and delivered scalable REST APIs to unify CRM, inventory, and checkout workflows, reducing integration-related incidents by 30%.
- Conducted 50+ code reviews, mentored junior developers, and enforced coding standards that reduced regressions sprint-over-sprint.
- Managed a 7-person engineering team (6 developers + 1 UI engineer), helping prioritize work, unblock progress, and deliver consistent releases.
- Collaborated closely with stakeholders to define requirements, estimate timelines, and ship the redesign ahead of schedule.

Dynamis Inc Senior Software Engineer May 2022 - June 2023

Stack: React, C#/.NET Core, SQL Server, AWS, WebSockets

- Delivered multiple features weekly for emergency-management software used by federal and international agencies.
- Built real-time geospatial tracking, enabling incident monitoring with sub-second latency.
- Implemented encrypted synchronous and asynchronous communication, improving operational safety and meeting federal compliance requirements.
- Added multi-language support (10+ languages) to expand adoption across agencies.
- Designed secure data-storage workflows for sensitive information, contributing to successful security audits.
- Met regularly with clients to gather requirements, walk through change sets, and help shape roadmap priorities.

Distributed System Resources Software Developer (PHP) Sept 2021 - Apr 2022

Stack: PHP 7 and 8, Laravel, MySQL, jQuery, Linux

- Modernized legacy LAMP applications by introducing automated tests, decoupling components, and beginning migration to Laravel.
- Resolved 1,000+ production bugs, significantly improving system stability and reducing support tickets.
- Authored and maintained hundreds of documentation pages covering workflows, setup, and debugging.
- Improved key API endpoint response times by ~25% through targeted refactoring and caching.

ConocoPhillips Software Engineer May 2016 - Feb 2021

Stack: AngularJS, .Net, Python, AWS, Azure, SQL server, deeplens,

- Led major components of a company-wide migration from AngularJS/.NET 4 to React/.NET 5, serving thousands of internal users.
- Automated 50+ manual workflows, saving an estimated 150+ hours per month across teams.
- Built hundreds of internal scientific tools, enabling engineers to perform calculations, simulations, and data visualizations with high accuracy.
- Authored corporate training materials for AWS services (CloudFront, API Gateway, SQS, Lambda).
- Worked directly with internal clients to gather requirements and deliver custom solutions used daily across multiple departments.

EDUCATION

Missouri State University Bachelor of Science in Computer Science Aug 2014 - Dec 2017

- Treasurer For ACM @ MSU chapter * Student Networking Engineer 2014-2017 * Internship with BlueCrossBlueShield of KS 2017

Certifications

- AWS Certified Solutions Architect – Associate
- Certified Scrum Master (CSM)

Projects

- **Meal Planner:** Built a private LLM to help my family take care of grocery shopping.
- **Freelancing:** Built a website for a coffee shop, a bakery, and a bike shop. Helped business owners set up domains and make necessary changes to content.
